Market Outlook – February 2024

The Indian markets ended Feb'24 on a higher note. All sectoral indices ended positive, except for FMCG which closed in the red, while Oil & Gas, Auto and Real Estate were the top gainers. The Mid cap (-0.5%) and Small cap (-0.3%) indices underperformed the Large cap Index.

Most global markets ended positive, with the latest rally propelled by investor optimism about artificial intelligence. Other key developments include: (1) The government projected central government fiscal deficit at 5.1% of GDP in FY2025BE, lower than 5.8% in FY2024RE; (2) The RBI kept the repo rate unchanged at 6.5% as expected; (3) The US FOMC maintained policy rate at 5.25-5.5% as expected; (4) The minutes of the US FOMC meeting highlighted that members were not in a rush to start cutting interest rates; (5) The results of the Household Consumption Expenditure Survey (HCES 2022-23) indicate the share of expenditure on food has continued to fall while the shares of travel, consumer services & durable goods have increased; (6) Indian mutual fund industry body, AMFI, advised fund houses to implement investor protection measures for Small cap and Mid cap investments due to concerns about potential market bubbles.

Total institutional inflows fell as FPIs sold US\$592 Mn (until 28 Feb 2024) of Indian equities in the secondary market, whereas DIs continue to bid, buying stocks worth US\$3.1 Bn (until 29 Feb 2024).

On the economic front, the 3QFY24 GDP growth was 8.4% (2QFY24: 8.1%). CPI Inflation in Jan'24 moderated to 5.1% (5.7% in Dec'23) while WPI inflation in Jan'24 moderated to 0.3% (0.7% in Dec'23). IIP growth in Dec'23 increased by 3.8% (2.4% in Nov'23), led by manufacturing activity while the goods trade deficit in Jan'23 narrowed to US\$17.5 Bn (US\$19.8 Bn in Dec'23), with exports at US\$36.9 Bn and imports at US\$54.4 Bn.

Moving forward, the bull market is unlikely to end without signs that fundamentals are worsening. Modest real rates, given stable-to-rising real GDP growth, sets the stage for higher share prices. Although there are concerns that valuations (in particular market cap to GDP) appear to be stretched, share prices have barely kept pace with earnings over the past three to five years. Trend earnings are still below nominal GDP while we remain in an earnings upcycle. Strong relative and absolute earnings growth, which is underpinned by an emerging private capex cycle, re-leveraging of corporate balance sheets and unfolding of a structural rise in discretionary consumption, makes Indian equity valuations tolerable. Equity allocation on Indian households' balance sheets remains low and the rising pool of domestic savings flowing into equities, which we see as a multi-year secular story further supported by demographics and retirement plan flows, will continue to support the Indian Equity markets in years to come.

Primary Risk Disclosures:

Investment in shares of the Fund involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal and there is no assurance or guarantee that the objectives of the Fund will be achieved.

As the price / value / interest rates of the securities as well as the currency in which the Fund invests fluctuates, the value of your investment in the Fund may go up or down depending on the various factors and forces affecting capital markets and money markets in India.

Past performance of the Promoter / Investment Manager does not guarantee future performance of the Fund and may not necessarily provide a basis of comparison with other investments.

The name of the Fund does not, in any manner, indicate either the quality of the Fund or its future prospects or returns.

The Fund is not a guaranteed or assured return fund.

Indian equity and Equity Related Instruments by nature are volatile and prone to price fluctuations on a daily basis due to both macro and micro factors.

The use of derivatives by the Fund affects the volatility of the Fund and exposes it to the risk of loss due to the unexpected application of a law or regulation or because contracts are not legally enforceable or documented correctly.

The Morningstar Rating TM for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period has the greatest impact because it is included in all three rating periods.

Lipper Leaders for Total Return may be the best fit for investors who want the best historical return, without looking at risk. This measure alone may not be suitable for investors who want to avoid downside risk. For more risk-averse investors, Total Return ratings can be used with Preservation and/or Consistent Return ratings to make an appropriate selection that balances the risk and return. The funds in each index receive scores for each metric in each time period. The bottom 20% of funds receive a "1," the second quintile receives a "2," the third a "3," the fourth a "4." Meanwhile, the fifth quintile receives a "5." The top 20% of funds, those ranked "5," earn the "Lipper Leaders" designation.
