Market Outlook - October 2021

Indian equity markets hit all-time high levels during the month. However, gains were not sustainable, and equity markets ended almost flat amid concerns over steep valuations, rising commodity prices, inflationary pressure and liquidity normalization signals by the central bank. Small cap stocks performed broadly in line with large caps falling by 1%, while Mid-caps underperformed by 1% in October. By sector, Consumer Discretionary, Financials, Energy outperformed while Industrials, Materials, Utilities, Communication Services, Healthcare, IT, and Consumer Staples were notable laggards.

FIs were net sellers of Indian equities (-\$1.5bn, following +\$1.1bn in September). In April, FIs, net sold \$1.5bn in equities, breaking the 6th inflows streak that started in October last year. In May and June, they again turned to be net buyers. July saw a retracement with FI net selling of \$1.7bn. By quarter, Q1 saw \$7.3bn of inflows, while Q2 and Q3 ended at a modest \$758mn and \$446mn of net buying respectively. FIs were net sellers in the debt markets too, with outflows of US\$174mn in October. DIIs remained large net equity buyers for the eight month running (+\$597mn, vs +\$809mn in September). Mutual funds were net equity buyers at US\$212mn while insurance funds bought US\$385mn of equities in October.

We expect the cyclical recovery to continue: We expect GDP to move into the positive zone on a two-year CAGR basis from QE Sep. We believe that the ongoing recovery will be supported by pent-up demand, external demand and public capex. Further, the improving vaccination trend (35% of adult population is fully vaccinated) will help in a broad-based consumption recovery. We believe that improving demand conditions coupled with conducive policy mix will help in improving the outlook for private capex in F2023. The key risks to watch in the near term will be the pace of vaccination (any slowdown could increase risks) and trend in Covid-19 cases – potential re-acceleration, threat from new variants, and concomitant restrictions on activity.

Though current headline valuations seem elevated, however in Med-to-long term valuations based on normalized earnings seem reasonable. We maintain our view to play domestic cyclicals, industrials, financials, and IT.

The Morningstar Rating™ for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period has the greatest impact because it is included in all three rating periods.

Lipper Leaders for Total Return may be the best fit for investors who want the best historical return, without looking at risk. This measure alone may not be suitable for investors who want to avoid downside risk. For more risk-averse investors, Total Return ratings can be used with Preservation and/or Consistent Return ratings to make an appropriate selection that balances the risk and return. The funds in each index receive scores for each metric in each time period. The bottom 20% of funds receive a "1." The second quintile receives a "2," the third a "3," the fourth a "4." Meanwhile, the fifth quintile receives a "5." The top 20% of funds, those ranked "5," earn the "Lipper Leaders" designation.
