Market Outlook – January 2023

Indian equities fell while underperforming the emerging market region and peers (MSCI APX)/EM: +8.6%/+7.9% MoM). Mid-caps (-4.3% MoM) and small caps (-1.5% MoM) though weak, underperformed and outperformed the large caps respectively. All sectors barring IT and Consumer Discretionary ended the month in the red.

Globally, most of the markets ended with positive returns; Hong Kong, Shanghai and US SPX gained 10%, 5% and 5%, respectively. Indian markets were the worst-performing markets globally. Other key developments in the month: (1) China lifted quarantine provisions for inbound travelers, (2) the World Bank slashed its growth forecasts for most countries and regions and warned that new adverse shocks could tip the global economy into a recession, (3) sharp fall in Adani group stocks, and (4) the BOJ maintained its policy rate at (-)0.1% and surprised markets by not tweaking the range for the 10-year yield fluctuations following a surprise move of +/- 50 bps in the previous meeting.

January witnessed, growth in workers' compensation come in below estimates for the US markets. US house price inflation also slowed to 8.2% in Nov, the lowest since July 2020. Eurozone managed to show growth of 1.9% yoy in Q4 CY22, managing to avoid a recession even amidst high energy costs and rising interest rates. IMF has upgraded the CY23 global growth forecast by 0.2% to 2.9% yoy on the back of higher household spending and lower inflation forecasts.

FII's continued their selling momentum in January (-\$3.1bn, following -\$0.2bn in December). India saw FII outflows of \$17bn in CY22. DIIs saw buying of \$4.1bn in January, keeping on trend with the previous month (+\$2.9bn). Mutual funds were buyers in January with inflows of \$1.2bn and Insurance funds were net buyers in the month with outflows of \$2.9bn.

In India, GST collections in Jan came in at 1.56 trillion, the second highest ever. Core sector growth has also come in at a 3-month high. The Economic Survey 2022-23 provided a particularly optimistic growth outlook, while emphasizing the need to continue to focus on capex and fiscal consolidation. It projects India's economy to grow at 6.5% (range of 6 – 6.8%) in FY24 and sustainable growth of 7.8% in the medium term. For India, earnings growth is expected in the range of 12-14% and valuations are expected to remain elevated (for both large caps and mid caps) at above pre-COVID levels while equity market returns are expected at 8-10% (back-ended towards 2H2023).

For flows into India, we believe that domestic flows will remain steady while FPIs are likely to sell in 1H2023 but there will likely be a revival in flows in 2H2023. FPIs are likely to look at cheaper valuations (e.g. China) in 1H2023 for Emerging Market allocations.

India likely to have relatively cheaper valuations in 2H2023 and with long-term demographic story intact, we expect flows to come in 2H2023.

Primary Risk Disclosures:

- Investment in shares of the Fund involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal and there is no assurance or guarantee that the objectives of the Fund will be achieved.
- As the price / value / interest rates of the securities as well as the currency in which the Fund invests fluctuates, the value of your investment in the Fund may go up or down depending on the various factors and forces affecting capital markets and money markets in India.
- Past performance of the Promoter / Investment Manager does not guarantee future performance of the Fund and may not necessarily provide a basis of comparison with other investments.
- The name of the Fund does not, in any manner, indicate either the quality of the Fund or its future prospects or returns.
- The Fund is not a guaranteed or assured return fund.
- Indian equity and Equity Related Instruments by nature are volatile and prone to price fluctuations on a daily basis due to both macro and micro factors.
- The use of derivatives by the Fund affects the volatility of the Fund and exposes it to the risk of loss due to the unexpected application of a law or regulation or because contracts are not legally enforceable or documented correctly.

The Morningstar Rating™ for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period has the greatest impact because it is included in all three rating periods.

Lipper Leaders for Total Return may be the best fit for investors who want the best historical return, without looking at risk. This measure alone may not be suitable for investors who want to avoid downside risk. For more risk-averse investors, Total Return ratings can be used with Preservation and/or Consistent Return ratings to make an appropriate selection that balances the risk and return. The funds in each index receive scores for each metric in each time period. The bottom 20% of funds receive a "1", the second quintile receives a "2", the third a "3", the fourth a "4", and the fifth quintile receives a "5". The top 20% of funds, those ranked "5", earn the "Lipper Leaders" designation.
